Kagiso Quinton Jiyane

Software Engineer Intern

kagisojiyane28@gmail.com | Pretoria, South Africa | +27 69 787 4817 | linkedin.com/in/kagiso-jiyane | github.com/QuintonCodes | quinton-portfolio.vercel.app

Summary

Enthusiastic Software Engineering Graduate and Software Engineer Intern with a genuine passion for writing clean code and shipping impactful full-stack, mobile, and Web3 systems. I thrive in collaborative team environments and am driven by a continuous desire to learn and master new technical concepts.

Skills

Languages: C#, TypeScript, Python, JavaScript, SQL.

Web & Mobile: React, Next.js, React Native (Expo), Tailwind CSS.

Backend & Cloud: ASP.NET Core, Node.js, RESTful APIs.

Database & DevOps: PostgreSQL, Neon, Prisma ORM, Docker, Git, GitHub, Jest, CI/CD, Agile.

Soft Skills: Innovative Problem Solving, Cross-Functional Collaboration, Professional Communication, Adaptability.

Work Experience

Software Engineer Intern | Reslocate — Oct 2026 – Present

- Engineered and tested software solutions and technology products to drive digital business development and create measurable organizational value.
- Executed business analysis, market research, and data analysis to find operational improvements and deliver technology-enabled business solutions.

Part-Time Web Developer | Caledon Code — Oct 2025 – Nov 2025

- Refactored frontend components using React (Vite) and Tailwind CSS, accelerating page load speeds by 25% across 15+ pixel-perfect, Figma-compliant UI components.
- Delivered a fully functional web prototype meeting 100% of client specifications within a 14-day rapid-delivery sprint, under real-world client delivery pressure.

Full Stack Web Developer | Freelance — Feb 2025 – Sep 2025

- **Takalani Lubrication**: Deployed a business website with automated chatbot integration, decreasing manual client inquiries by 80%.
- **Karanka Multiverse**: Integrated a Web3 payment gateway processing hybrid fiat/crypto transactions across 5+ digital assets, configuring MetaMask security protocols and keeping 99.9% Vercel deployment stability.

Education

BSc. Information Technology (Software Engineering) | Eduvos — Feb 2023 – May 2026

- **Graduated:** 14 May 2026
- **GPA**: 3.45/4.00 (81.36%)

Certification & Training

Small Business Development Training Program (NQF Level 4, SAQA 114600) — Sep 2026

- **Duration**: 2 weeks
- **Completed**: 2 Oct 2026

Projects

TrustBlock | Web3 Escrow Platform trust-block-ashen.vercel.app

Tech: Next.js, TypeScript, Tailwind CSS, Prisma ORM, Solidity

- Developed a decentralized escrow service enabling secure peer-to-peer transactions with milestone-based payments.
- Authored and deployed smart contracts in Solidity for automated fund release and dispute resolution.

EduLite | Full Stack LMS Mobile Platform github.com/QuintonCodes/edulite

Tech: React Native (Expo), Next.js, TypeScript, Prisma ORM, PostgreSQL

- Architected a scalable Monorepo structure separating the mobile frontend and API backend, ensuring code maintainability and strict type safety.
- Developed a comprehensive assessment engine supporting real-time quizzes, PDF past-paper viewing, and progress tracking.

SwopMarket | P2P E-Commerce Platform swop-market.vercel.app

Tech: Next.js, TypeScript, Tailwind CSS, Prisma ORM, PostgreSQL

- Developed a secure peer-to-peer marketplace featuring streamlined transaction flows that reduced buyer-seller communication overhead by 40%.
- Optimized database schemas and queries using Prisma ORM, achieving sub-200ms API response times for product feeds.
